

Sharing our Provincial Achievement Test Results for 2017

We are pleased to share our results for the 2016-2017 school year for Lilian Schick School. Our teachers are creative and continue to push for innovative ways to engage students in learning. In turn, our students are inquisitive and engaged learners who continue to amaze us in with the work they do throughout the year. This past year, our provincial achievement results were very respectable in the acceptable standard, as in many cases we were above the provincial average. We are always working to improve our practice to ensure we are meeting the needs of today's students.

All parents should know that education in the province of Alberta is continually evaluating the provincial achievement exams in hopes of finding relevant ways to measure student learning relating to emerging curriculum. As we want our students to be engaged thinkers and ethical citizens with an entrepreneurial spirit we will need better ways to assess them and report their progress.

We encourage all interested stakeholders to research information relating to new curriculum so they are current with the latest information from Alberta Education. Please see the link for more information:
